LADLES FOR FOUNTAINS.

It Is Proposed to Replace Cups With Dippers.

With heavy cast iron ladles Superintend. ent Frank L. Hines of the waterworks department hopes to solve the problem of keeping the public fountains supplied with drinking vessels. The ladies cannot be called cups, but they will answer the same purpose, the thirsty pedestrian not caring great deal about the appearance of the ressel. The Indies have a large bowl and i long handle. In the end of the handle s a hole for fastening the dipper to the

is a hole for fastening the dipper to the fountain.

Mr. Hines says the dippers are used in many of the Eastern cities, and that they have been found to give satisfaction. He says the ladles cannot be duplicated in the West, and that if any person is found with one in his possession there will be no question but that it was stolen from the city. Seventy-two of the ladles have been purchased, and they will be attached to the fountains today. During the past ten years it is estimated that more than 1000 tin and porcelain cups, some costing as much as 40 cents each, have been stolen from the public fountains in Sait Lake. The city expects to have no more trouble along this line.

My trouble would return as bad as ever. I consulted you in July, 1900, and by your advice commenced using Dr. Pierce's remedies. I took two bottles of the 'Golden Medical Discovery,' three vials of the 'Pellets,' and some of the 'Extract of Smart-Weed,' as you advised. I have not had any return of my trouble since using your medicines. Am now seventy-one years old and I never had anything to relieve me so quick. I think Dr. Pierce's medicines the greatest on earth.
